

Steel Railings Traditional

BOW TOP

Bow top railing is a well established fencing product. Each fencing panel is prefabricated into fully welded solid steel sections resulting in a durable fencing system which will last for decades. Bow top is an extremely popular railing system in the UK, particularly when child safety is an issue, due to the safer nature of the rounded tops of its verticals. Various heights of up to two metres are available and the system can either be galvanised or galvanised & polyester powder coated.

Why specify Bow Top?

- Child friendly
- Durable
- Attractive
- Robust
- Good vandal resistance

Common Applications:

- Traditional sites
- Commercial sites
- Urban Housing
- Parks
