We believe that the argument for timber hoarding no longer stands up.

Is this how **you choose to portray your corporate image...?**

Or do **you prefer this...?**

Please contact us now, we look forward to being of service.

Product Options

Darfen Steelhoard

We launched Darfen Steelhoard 2.4m high in the Spring of 1997 as 'a brand new concept in site hoarding' - a system carefully designed to be reusable. Since then we have sold or hired the system to most of the country's leading contractors and housebuilders. Nearly everybody that has tried Steelhoard has come back for more. The major reason for this is a simple one, they have calculated for themselves how much money they will save by reusing their hoarding on site after site.

This is not the only reason that Steelhoard has been so well received. Another factor is the way that it looks - immaculate. It projects exactly the corporate image that successful companies want to be associated with. What's more, Steelhoard retains its aesthetic appeal with little or no maintenance. Steelhoard will not rot and degrade as timber often does, nor will it require regular painting. Being steel throughout, it is unlikely to be subjected to arson attacks, and its profiled panels will help to deter graffiti artists and bill stickers.

Darfen Mini Steelhoard

Darfen Mini Steelhoard 2m high was launched in 2005 using the same concept as Steelhoard, giving all the benefits i.e. durability, aesthetic appearance etc, making it a great alternative to traditional lower height site barriers/screens.

Service

Darfen's installation and relocation service matches the excellence of its product. When it's time to leave site, one phone call to Darfen is all it needs to ensure that all Steelhoard is dismantled and ready for transportation to your next site.

Darfen Durafencing is the U.K.'s largest fencing contractor, is quality assured to ISO 9001-2000 and offers a Steelhoard service on a national basis, from regional branches strategically located around the country.

Purchase

Steelhoard is offered, on a supplied and fully installed basis and is competitively priced against other hoarding systems.

Contract Hire

Offered on a supplied, fully installed and dismantle basis. Contract hire is often the most cost-effective option if hoarding is only required for a limited period.

Typical major urban development work utilising Steelhoard.

Darfen Steelhoard can readily accommodate gently sloping ground.

Steelhoard is ideal for protecting the public from the dangers of construction sites.

Steelhoard is available in a range of colours to enhance your corporate image.

"Big Brother" used standard 2.4m High Steelhoard, with additional Barbed wire toppings, as well as a non standard 3m High system.

Barbed wire topping can be supplied as an optional extra.

Both Standard and Mini Steelhoard have a 5.4 metre wide pair of gates. Pedestrian gates are also readily available.

A typical security compound including double leaf gate and pedestrian gate.

Crowd loaded Steelhoard has been developed to protect the public at a number of football grounds and is calculated to withstand 5kn per metre.

Steelhoard has been reused on a number of occasions during refurbishment and new build to conceal construction activities.

Vision panels and flat panels for signage can be incorporated into the Steelhoard line.

This site was customised with a welded mesh topping to meet clients' requirements.

This site incorporated an integrated lighting system.
