

Expanded Metal Fencing

EXTELL

EXTELL is a general purpose perimeter fencing system designed to provide a high degree of vandal resistance at a cost normally associated with less durable fencing systems. The expanded metal mesh is formed from sheet steel, without any welds, making it a highly durable fencing fabric. Posts are made from heavy duty steel section and, in conjunction with the steel horizontal stringers, provide a strong rigid framework. Anti-tamper fixings are incorporate as standard.

EXTELL

specification

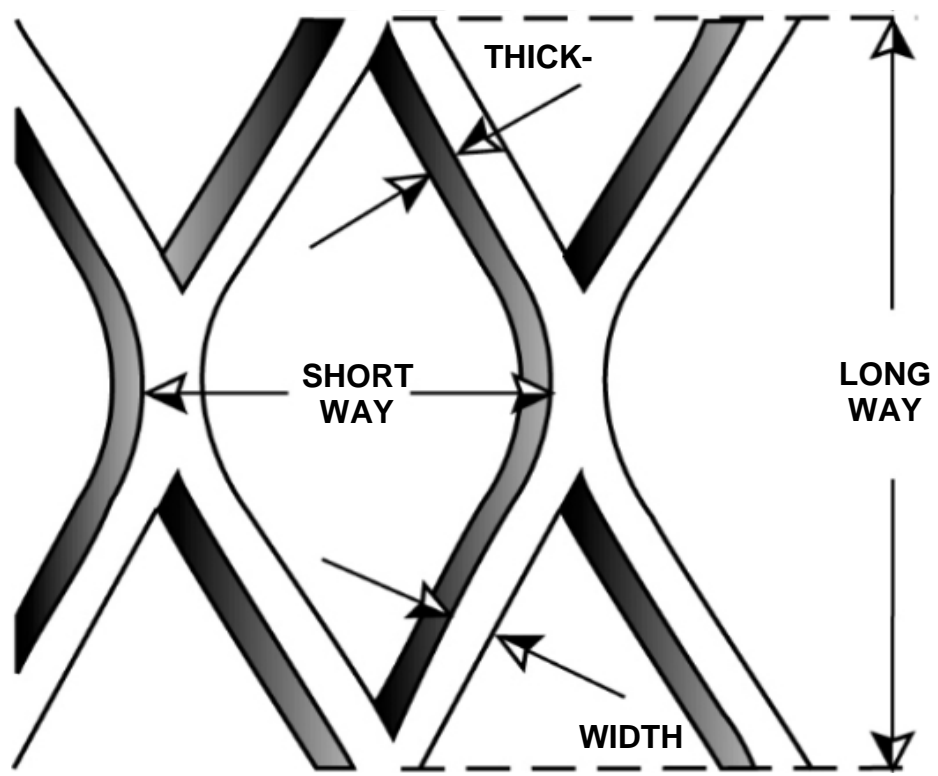

HEIGHTS: 1.8m, 2.1m and 2.4m

MESH TYPE	LONG WAY	SHORT WAY	THICKNESS	WIDTH
MEDIUM	102mm	51mm	3.0mm	3.5mm
