DARFEN DURAFENCING

Steel Railings Modern

CRUSADER

CRUSADER railings have a traditional solid bar appearance. but are in fact manufactured from hollow section steels using modern construction methods. The result is a traditional looking railing but at a much lower than normally expected cost. Four different finial head styles are available as standard as well as the choice of square or rounded hollow section verticals. This elegant fencing system makes good budgeting sense.

CRUSADER

specification

PANEL HEIGHTS	No of Verticals
1200mm	22
1800mm	22
