

Steel Railings Traditional

VERTICAL BAR RAILINGS

Vertical Bar Railings are a well established perimeter fencing system in the UK. Each fencing panel is prefabricated into fully welded solid steel sections resulting in a durable fencing system which will last for decades. Vertical bar railings are available in a variety of thicknesses and head styles, the most common of which are pointed, chamfered, round or blunt. The flexibility of choice means that all security requirements can be catered for, whether you are looking for an ornamental fence to demarcate a boundary, or looking for an anti-climb solution to deter trespassers.

Why specify Vertical Bar Railings?

- Durable
- Attractive
- Robust
- Good vandal resistance

Common Applications:

- Traditional sites
- Commercial sites
- Urban Housing
- Parks
- Schools
- Recreational grounds

vertical bar

specification
