

eco hoard Fotoply

Darfen in conjunction with Fotoply introduce our new revolutionary hoarding panel. It is without limits – providing an exterior grade, 100% certified plywood sheet that can display ‘anything you can imagine’. This new product has been through an extensive programme of research and development and is now tried and tested. It is the ideal material for use as site hoardings.

Available across the UK, Ecohoard Fotoply is supplied and installed by a fully CSCS carded workforce and some of the main features of Ecohoard FotoPly include;

A product that is PEFC certified

Full exterior capabilities

Clear and vibrant images that stand out

Easy fixing with standard tools

Graffiti resistant & jet washable

CNC capabilities if required

A UV fast guarantee for 3 years

RFID technology enabled

In addition to its full chain of custody status, FotoPly is constructed of lightweight European spruce plywood meaning there is minimal road miles in the manufacture and distribution of the board. This is also a product that has real benefits, as it is multi-use – it can be erected on site (in one visit) and then removed and re-used on another site. It can then have a ‘second life’ as flooring, roofing, shelving etc, before it can be eventually re-cycled for use as bio-fuel. With standard sizes at 2440mm x 1220mm and 3050mm x 1220mm as well as thicknesses of 6mm and 18mm, we are confident most standard requirements can be achieved. However we are able to offer the additional flexibility of other sizes and thicknesses should these be required. If you require any further information or clarification on any points, then please contact Darfen Hoardings on 08457 023878.
