

eco hoard RE-plas

Ecohoard RE-plas is a plastic hoarding system made from recycled plastic bottles. This environmentally friendly hoarding system can be used on site multiple times and then recycled after you have finished using it. It is suitable to use indoors or outdoors and will help you to reduce your carbon footprint!

- Environmentally friendly
- Sustainable sourced product
- Fully recyclable after its lifespan
- Can be re-used on your next site
- Weatherproof
- Robust
- Windloading up to 50mph
- Uses the tried & tested components of Darfen Steelhoard
- Installed by a fully CSCS carded workforce

"Darfen Hoardings installation team were very helpful in providing advice and overall we received an excellent service!"

David Anderson, Bridge Master
