

eco hoard Timber

Made from waste wood chippings to produce an engineered wood product called oriented strand board (OSB) this temporary hoarding system is fully recyclable. The OSB has a unique coating which makes it water resistant, tough, UV resistant, colour fast and resistant to algae and fungi. Ecohoard Timber is colour coated as standard and can be altered to suit your corporate identity whilst still being 100% recyclable.

A product that is PEFC certified

Can be re-used on your next site

Weatherproof

Sustainable sourced product

Full exterior capabilities

Easy fixing with standard tools

Full recyclable after it's lifespan on site

Robust

Ecohoard Timber is an eco friendly budget timber fencing to help you lower your carbon footprint. Ecohoard Timber is a durable temporary hoarding system which can be re-used or recycled! Available on a supply and install basis across the UK this system is available as standard in a height of 2.4m. Bespoke sizes are available upon enquiry.
